

Product data sheet

Mini LED sensor switch

*

Activation of all GEZE automatic doors

AREAS OF APPLICATION

- For activation of all GEZE automatic doors
- High-quality and hygienic activation with visual feedback of the activation command

Mini LED sensor switch *

PRODUCT FEATURES

- Touch-sensitive capacitive push button with green/red LED illumination
- Long service life – more than 100 million hystereses
- Shock-resistant and protected from vandalism by protection degree IP08
- Requires drilling hole diameter of 22.2 mm
- Continuously illuminated green (can be switched off), illuminated red when touched
- IP rating IP69

TECHNICAL DATA

Productname	Mini LED sensor switch *
Dimensions	28.5 x 28.5 x 21 mm
Current consumption	20 mA
Output	PNP transistor output
IP rating	IP69K
Type of installation	Flush-mounted installation
Cable connection type	Cable prepared for connection to screw terminal
Connector cable length	200 mm
Service temperature	-30 – 70 °C
